

Classroom Garden

As a class we will be learning about how we can take care of our planet by planting a garden. We will learn about how planting a garden helps everyone and keeps the planet healthy.

Materials:

- Small pots, recycled containers, or egg cartons
- Soil
- Seeds
- Spoons or scoops
- Watering can or spray bottle
- Labels and markers

Steps:

1. Bring the materials to your table
2. Fill your small container with soil
3. Make a small hole in your container with your finger or a spoon
4. Place your seed in the hole
5. Cover the hole with soil that was moved
6. Water the soil lightly until soil is damp
7. Label your container with names and seed type
8. Continue watering your plant every day
